

Safety isolating transformer

RKD 60/2x18

Picture shows RKD 60 2x12

Advantages

| |
|--|
| Minimum size at high power |
| Low weight |
| Dual input and dual output voltage for series or parallel connection |
| Minimal no-load losses |
| Outstanding temperature behaviour thanks to low magnetic leakage field |
| Very low noise field |

Applications

As a mains transformer for adjustment of the voltage and simple electrical isolation.

As an isolating transformer for the safe electrical isolation of the input and output sides. The transformer may be used to set up protective separation as a protective measure in accordance with VDE 0100.

As a safety isolating transformer for the safe electrical isolation of the input and output sides. The transformer is suitable for creating SELV and PELV circuits because of the limit on the output voltage.

Sample application

PRI:
Parallel connection (115V): brown with white/violet with blue
Series connection (230V): violet with white

SEC:
Parallel connection: red with grey/black with orange
Series connection: black with grey
