

PPAN-24-THRU

24-Port
Category 5e
Modular Through
Patch Panel

Performance Grade Cat5e Connectivity

Data Enclosures

Gigabit Ethernet

PBX and VoIP Patching

Legacy LAN & WAN

Add quality category 6 patching to your network

Upgrading your existing cat5e or even starting from scratch with a new category 6 network can be expensive. Not with LMS Data.

The new LMS Data **PPAN-24-C6-VLC** is a low cost but importantly, high quality, 24-way cat5e UTP Patch Panel for all your structured cabling, gigabit ethernet or VoIP applications. Housed in a robust 1U high enclosure with a standard, 19-inch wide form factor means its ideal for all structured, server or broadcast type cabinets.

Also incorporated is a newly developed vertical punchdown IDC which offers standard AWG copper cores a secure connection thus reducing attenuation and thus increasing signal qualities over all ethernet, VoIP and other IP networking scenarios.

Part of the LMS Data 25-year warranty system*, the PPAN-24-C6-VLC is your ideal patching solution for installers, integrators and data managers.

specifications:

24-Port, 19-inch wide Category 5e Through Patch Panel

Performance Category 5e certified - Gigabit compliant

Easy-clip, modular through couple RJ45 design

Exceeds current Category 5e conformance guidelines

Built-in LAN port redundancy - Easy to swap out

High conductivity, nickel plated RJ45 connections

Individual LAN port numbering (1-24)

Integral rear cable management for secure connections

Ideal for home, SME and Smart Home networking

* LMS Data 25-year warranty option as a cost-free option
