# **3-point internal micrometer IMICRO**

## Application:

For high-precision measurement of through-bores, even at high measuring depths.

## **Execution:**

- Measuring faces made of hardened steel
- Friction coupling for consistent, repeatable measuring force
- Self-centring and self-aligning

## Advantage:

- Ground step taper for high precision
- Insensitive to influence of body heat from the user's hand and fluctuations in ambient temperature
- The only 3-point internal micrometer working on the Abbe principle

## Delivery:

In cardboard box

Art. no.	31695 003
Brand	TESA
Manufacturer Part Number	00813410
Min./max. length measuring range	3.5-4 mm
Measuring depth	20 mm
Error limit	4 μm
Vernier scale	0.001 mm
Measuring spindle increments	0.5 mm
Calibration Group	I
DIN	863
Calibration Group Description	Internal micrometers (3 point)
Gross Weight	0.300 kg
Product Group	362

### **EAN**

7630041108330
