

Brush mat care system

Modular system for bolting together

Application:

For placing and processing components with a sensitive surface on workbenches and other tray compartments.

Execution:

- Brush fibres provides temperature, chemical and mechanical resistance
- Brush panels made of polypropylene
- Fibres made of durable polyamide 6, fibre height 8 mm

Advantage:

- Easy assembly thanks to the existing bore holes
- Surface-protecting fibres, no swarf damage
- Noise reduction
- Easy movement of products and parts on brush fibres
- Flexible units can be individually positioned, easy to retrofit in assembly workstations, various degrees of hardness can be combined, partial replacement possible, ideal for geometries with recesses and small contact surfaces

Art. no.	50233 611
Brand	MINK
Manufacturer Part Number	MCS-K8
Width	499 mm
Depth	99 mm
Gross Weight	0.400 kg
Product Group	504
