

ILLUMINATED HEAD BAND MAGNIFIER

Roebuck

Description

This head band magnifier has the following features as standard. Multi-coated acrylic lenses offer a choice of 4 magnification powers via a combination of fixed, flip-up and monacle lenses: 1. 5, 3. 0, 9. 0 and 10. 5. It also has bright dual LED illumination, tilt and swivel LED adjustment, a visor that can be lifted and lowered as required, and the magnifier can be used when wearing glasses. The headband magnifier is most useful for assembly and inspection work and is also suitable for hobbies, crafts and general reading.
