

SKU: FIT0242

5mm LED Pack

## INTRODUCTION

This package includes 50 x 5mm LEDs, 5 different colors. It covers five common colors: green, red, yellow, blue, and white. It is ideal for your Arduino prototype projects. Get this package of all the most common color LEDs for your next project. Very handy for experiments and home cooked circuit boards.

## APPLICATIONS

- Prototyping, LED decoration, Indicator light

#### SPECIFICATION

- Voltage: 1.8 to 2.2V (Basic Red, Green, Yellow)
- Voltage: 2.4 to 2.7V (White, Blue)
- Max current: 20mA
- Suggested using current: 16-18mA
- The Negative lead (Cathode): Shorter Lead
- Larger Plate inside LED
- Flat on body of LED adjacent to negative lead
- Positive lead (Anode): Longer Lead
- Smaller Plate inside LED
- Size: 36x5x5mm (1.42x0.2x0.2")
